

MOHSEN BIJARI

Birjand, Iran | +98 919 585 4357 | [Email](#) | [LinkedIn](#) | [Scholar](#) | [ORCID](#)

Quantitative genetics researcher with experience in statistical modelling, animal breeding, and data-driven evaluation of health and performance traits in dairy cattle. Strong interest in longevity, welfare-related traits, and the integration of phenotypic big data with genetic improvement programs. Skilled in SAS and R-based statistical workflows and the interpretation of complex livestock datasets.

EDUCATION

- 2017-2020
- Master of animal genetic and inbreeding**
Isfahan University of Technology
Thesis title: A study on Economic Consequences of Foot and Mouth Disease (FMD) in Holstein cows in Iran
Cumulative GPA 3.14 out of 4 (15.67 out of 20)
- 2013-2017
- Bachelor of Animal sciences**
Birjand University
Project titles:
 - A study of methods to evaluate the success of the transition period in early lactation of dairy cows
 - Management and breeding of freshwater lobstersCumulative GPA 3.1 out of 4 (15.5 out of 20)

RESEARCH PROJECTS

- 2017-2020
- A study on Economic Consequences of Foot and Mouth Disease (FMD) in Holstein cows in Iran**
Isfahan university of Technology, Isfahan, Iran; (My M.Sc. Thesis Title, passed with “Excellent”)
Supervisor: Dr. Ali Sadeghi-Sefidmazgi
 - Inventing a new economic formula to estimate the financial losses caused by the disease
 - Epidemic investigation
 - Investigating the occurrence of FMD in different seasons and different parity
 - Estimating the effect of productive and reproductive traits on the incidence of disease
 - Investigating the impact of disease outbreaks on productive and reproductive traits
 - Estimating the effect of productive and reproductive traits on the incidence of disease and potential implications for longevity in Holstein cows
 - Using SQL in data management
 - Statistical Analysis using SAS and R
- 2016
- A study of methods to evaluate the success of the transition period in early lactation of dairy cows**
Birjand university, Birjand, Iran; (My B.Sc. Project Title, passed with “20”)
Supervisor: Dr. Mohsen Mojtahedi
 - Assessed transition period success linked to dairy cow productive lifespan
 - Analysed longitudinal physiological and performance data
 - Used mixed models and statistical prediction methods
 - Explored welfare and metabolic traits related to longevity
 - Managed complex phenotypic datasets
 - Interpreted data for health and genetic improvement decisions
 - Connected trait analysis to economic and survival outcomes

2015

Management and breeding of freshwater lobsters

Birjand university, Birjand, Iran; (My B.Sc. Seminar Title, passed with “20”)

Supervisor: Dr. Mohsen Mojtahedi

- Managed aquatic breeding and husbandry practices for freshwater crustaceans: familiar with reproductive cycles, larval stages, and environmental requirements.
- Applied data-driven protocols to optimize growth, survival, and culture conditions in freshwater aquaculture systems: including water quality and feed management.
- Integrated biological and management insights to enhance breeding success and production outcomes in crustacean aquaculture: relevant to genetic, physiological, and ecological aspects of livestock management.

Bijari, M., & Sadeghi-Sefidmazgi, A. (2023). A Study on some Factors Affecting the Incidence of Foot and Mouth Disease and the Culling Associated with in Iranian Dairy Cows. *Iranian Journal of animal Science*, 54(3), 289-301. DOI: 10.22059/IJAS.2022.349105.653909

RESEARCHING ASSISTANT EXPERIENCES

SPRING
2019

RESEARCHER ASSISTANCE

FEKA farm, Isfahan, Iran

(Project on: The effect of different colostrum feeding times on postnatal weight gain in Holstein calves)

AUTUMN
2018

RESEARCHER ASSISTANCE

Lavark farm, Isfahan university of technology, Isfahan, Iran

(Project on: Nutritional effects on multiple births in Afshari breed ewes)

SUMMER
2016

RESEARCHER ASSISTANCE

The research site of Sanen goats, Birjand University, Birjand, Iran

(Project on: The effect of different types of feed on the growth and lactation of Sanen goats)

HONORS AND AWARDS

FEBRUARY
2022

Earning the rank of distinguished advisor

Third rank advisor in Iran's Agricultural and Natural Resources Engineering Organization (SANKA), South Khorasan, Birjand, Iran

AGUSTE
2022

Among the top 100 researchers

Ministry of Cooperation, Labor and Social Welfare of Iran, Tehran, Iran

OCTOBER
2021

Top statistician

General Department of Cooperation, Labor and Social Welfare of South Khorasan, Birjand, Iran

DECEMBER
2020

Second place in the GPA

the second place in the GPA among the graduates of the field of animal genetic and inbreeding in Isfahan university of technology, Isfahan, Iran

DECEMBER
2020

Second place in the GPA

the second place in the GPA in the 2017 entries in the field of animal genetic and inbreeding in Isfahan university of technology, Isfahan, Iran

OCTOBER
2020

Iran's elites

Membership in Iran's national elites' foundation

SEPTEMBER
2017

Rank top 1 %

Rank top 1% of animal genetic and inbreeding Masters nationwide Entrance Exam

MAY
2016

The second rank of the Scientific Association of Animal Sciences

Harkat National University Festival, Birjand university, Birjand, Iran

Will be available upon request

SKILLS

- **Statistical & Genetic Software:** SAS 9.4, R, Python, BLUPF90, AIREML, SRNS, RStudio
- **Data Analysis:** SQL, big data handling
- **Genetics & Livestock Techniques:** Quantitative genetics, artificial insemination, longevity and reproduction analysis
- **Laboratory techniques**
- **Language Skills**
Persian: Native
English: Working proficiency
Danish: Basic

RELATED EXPERIENCES

FEBRUARY
2020–
PRESENT

Animal health advisor

SANKA, Birjand, Iran

2019–2022

Student advisor

Isfahan university of technology, Isfahan, Iran

JULY 2021–
DECEMBER
2021

Statistics expert

General Department of Cooperation, Labor and Social Welfare of South Khorasan, Birjand, Iran

2015–2016

Intern

Genetics laboratory, Birjand University, Birjand, Iran
